

The African Narrative on Climate Change (TANCC) is a non-governmental organization committed to unraveling and addressing the complex narratives around climate change, environmental conservation, and sustainable development within the African context.

## Vision

To be a leading voice and advocate for environmentally sustainable development and climate resilience in Africa.

## Mission

To establish a platform for dialogue, education, and action that focuses on Africa's stance on global climate initiatives and its own strategies for climate adaptation and resilience.

## Our Approach

We employ a multi-faceted approach that involves research, education, community outreach, policy advocacy, and international collaboration. We're committed to making use of media, particularly podcasting, radio and documentaries to disseminate relevant information.

At TANCC, we use compelling storytelling, data-driven research, and community-led solutions as the backbone of our strategy. We aim to bridge the gap between the scientific community, policymakers, and the general populace.

## Where We Work

TANCC is focused primarily on African countries but aims to build partnerships that transcend borders. We believe that while Africa has its unique challenges, the issues at hand are global, requiring international cooperation.

We delve into various aspects of climate change, from rising temperatures and its impact on agriculture to water scarcity, food security, and much more.

## Key Focus Areas

- Climate Adaptation & Mitigation
- Sustainable Resource Management
- Freshwater Conservation
- Biodiversity & Ecosystem Health
- Urban Resilience

## Core Activities

- Podcasting: A series that humanizes the stats, highlighting African innovation and resilience.
- On-the-Ground Initiatives: Community-based projects aimed at tackling localized environmental challenges.
- Policy Engagement: Advocacy and roundtable discussions that bring diverse stakeholders to the table.
- Research & Publications: Whitepapers, articles, and reports that offer fresh perspectives.

## What we Aim to Achieve

### To Educate and Inform

Elevate public understanding of critical environmental challenges, specifically focusing on climate change, freshwater use, land system change, biodiversity, and biogeochemical cycles in the African context.

### To Promote Sustainable Solutions

Advocate for and contribute to the development and implementation of innovative, sustainable, and equitable solutions to environmental challenges affecting Africa.

### To Empower Communities:

Empower individuals and communities across Africa with the knowledge, resources, and tools to adapt to and mitigate the impacts of climate change.

### To Advocate for Policy Change:

Engage with policymakers and institutions to affect positive change in regulations and practices concerning the environment and sustainable development in Africa.

## Who We Want to Work With

- Policy Makers
- Academic and Research Institutions
- Climate Activists and Environmentalists
- Local Communities
- International Organizations and Donors
